

WELCOME TO ALL SMILES CLEFT!

Our young son was born with a bilateral cleft lip and palate (BCLP.) His personality has forever changed the dynamic of our family and we would not have it any other way.

Over the course of our journey in trying to find the best care possible and to surround ourselves with our village of people, I decided to put it all together and share it with other families on their own journey with a cleft affected child. I have shared our experience in how we first found out, first year of surgeries, to present day dealing with speech and reading therapy, dental/orthodontic care and bone graft surgeries. I continue to learn and grow, gathering information and resources; which I share, as well as our personal experiences, on my website and blog.

I hope you find the information helpful in getting you prepared and putting your mind at ease for what is to come.

All Smiles is what I want for any cleft child and their family!
